

Claro

Banking support with verified outcomes

Spanish and Portuguese transaction support
with confirmed cases for human review

We keep organizer analysis, authored language scenarios and public demo fixtures
separate.

4.43M

transactions audited

42

distinct customer
utterances
in organizer transcripts

Specific requests, verified cases and follow-up

1 Preserve the request

Retain redacted customer words beside verified facts.

2 Confirm and verify

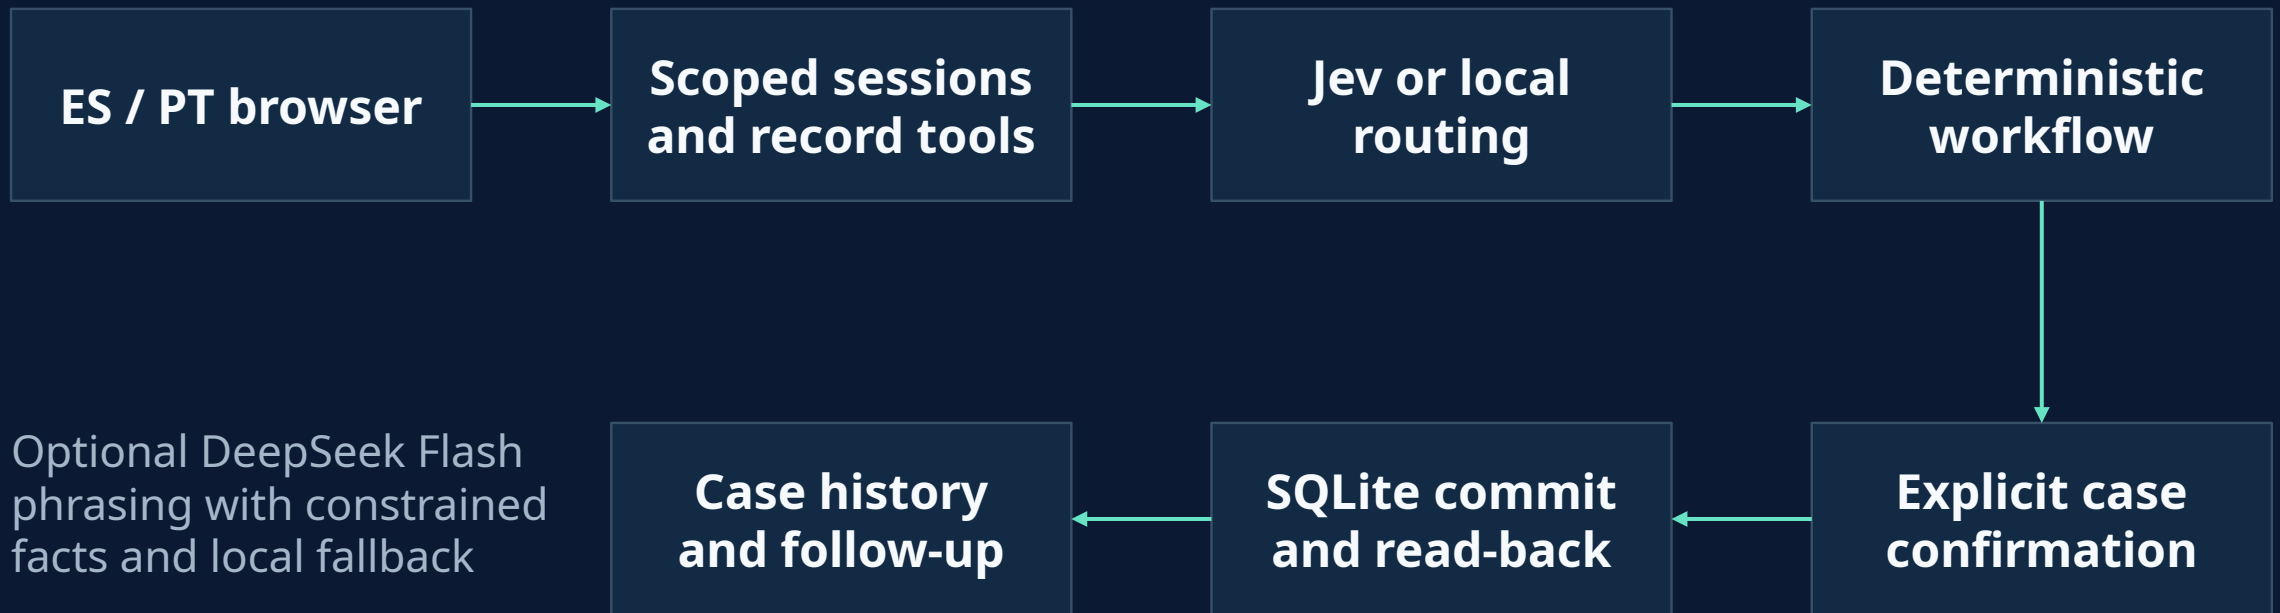

Commit one sandbox case.
Read it back before success.

3 Persist follow-up

Save the analyst question,
customer reply and status.

Permissions and actions stay in service code

Optional providers are implemented and mock-tested. Live inference remains unverified.

Opaque sessions + CSRF

Customer/workspace isolation

Idempotent confirmed writes

Fraud candidates did not earn release

4,425,008 validated transactions

Contracts, quarantine and source hashes
Strictly prior customer/currency history
Two full runs with identical feature bytes

Temporal evaluation

Train before January 2026
Calibrate January, select February
Test March through the June snapshot

Synthetic retrospective labels. Demo fixtures receive no fraud probability.

Claro / Factored 2026 / 4

451,823 test transactions / 409 fraud labels

Average precision

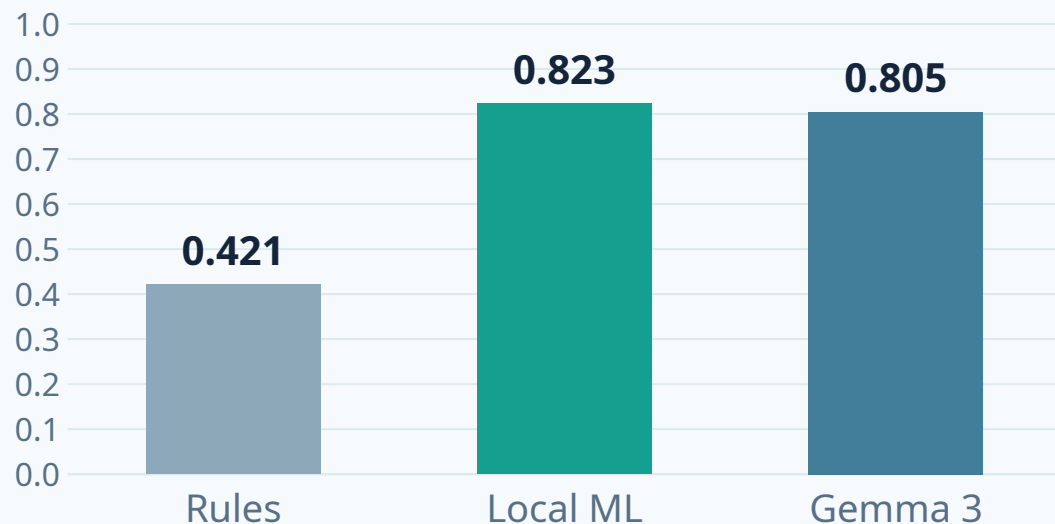

4 / 409

fraud labels reached at 1% review capacity by each learned candidate

Measured language and workflow results

Intent classification

140 frozen authored cases / macro-F1

117/140 exact labels correct

Six status/currency strata: 122/140 each. Same utterances, no demographic claim.

Authored tests, no independent human review. New 70-case provider challenge unscored.

Current local workflow

140 exposed cases / correct regression outcomes

60/60 handoffs preserve the request

Demo and the route to a bank integration

Public demo / release receipt linked

Deliberate trade-offs

Single worker and SQLite
Simple deployment. Free-host restarts
can reset sandbox state.

Optional external models
Usage and tariff estimates are logged.
Live provider results are still unverified.

Before real customers

Bank identity, approved policies, durable
storage and independent ES/PT review.
